EDUCATION

Bachelor of Science-Computer Engineering, University of Wisconsin-Madison

WORK HISTORY

Software Engineer, February 2024 – Present

Visiv Technology LP – Remote

- Designed and developed KPI-driven features enabling end-users to analyze portfolio data and make key, data-informed decisions
- Worked closely with client stakeholders to translate business requirements into scalable product features, ensuring alignment between technical delivery and user needs
- Led development of an extensible ArcGIS-based plugin, enabling clients to visualize and interact with their portfolio data directly with the platform
- Responded to ad hoc client requests by quickly designing and delivering solutions in collaboration with internal teams under tight and aggressive timelines
- Trained and mentored new hires, guiding onboarding and tracking progress to ensure efficient integration into team workflows and client schedules

Junior Software Engineer (Full Stack), May 2022 – October 2023

Complia Health, now part of Axxess Technology Solutions – Hybrid/Chicago, IL

- Worked with Flutter to implement UI features and GraphQL queries for a mobile home health care application.
- Designed and developed an automated API retry module using AWS Step Functions and AWS Lambda.
- Brainstormed and collaborated with multiple developers to carry out a SQL migration project in order to further a data liberation goal.
- Worked with Dagger, Azure DevOps and Terraform to streamline continuous integration and deployment pipelines.
- Experienced working with a team using an Agile Scrum Methodology.

Software Developer, July 2022 – June 2023

Youth Ministry Basketball League – Chicago, IL

- Developed a basketball league website to increase brand awareness and streamline player registration.
- Engineered a management application for league admins that expedited schedule updates and player statistic tracking.
- Gained experience working with Google Cloud, Gitlab, Docker and Terraform

President & Founder, August 2019 – August 2025

Youth Ministry Basketball League – Chicago, IL

- Founded and managed a high school church basketball league to bring competitive, faith-based basketball to the community
- Worked with referee coordinators and parish admins to organize league games and allocate space for team practices
- Oversaw all financial operations such as revenue collection, budget planning, expense allocation for uniforms and payment of staff
- Partnered with neighboring league owners and presidents to organize special events and additional competitions
- Proactively networked with neighboring school and parish officials to support league expansion and long-term community engagement
